The Integra MemoFix® Super Elastic Nitinol Staple is made using a proprietary manufacturing process that results in sustained compression using a simple insertion technique, along with advantages over competitive surgical staples. Additionally, MemoFix is designed for convenience and intraoperative flexibility, while offering sizes for most common foot procedures.

The MemoFix staple system is indicated for fixation and arthrodesis of the associated bones and joints of the hands and feet. Intended for single use only.

**MemoFix vs Leading Competitors**

14% more sustained compression than the competitive staple when measured at the in-vivo position.

*Based on 3rd-party testing of 4-point bend per ASTM F564
Single-step Insertion with Spreader
