The TCC-EZ® Total Contact System is an easy-to-use system that supports patient offloading compliance. TCC-EZ is a specialized offloading device designed to provide a protective wound healing environment.

The TCC-EZ is indicated for non-infected wounds with adequate blood supply:
- Diabetic Foot Ulcers located on the plantar, mid-foot or heel
- Post-Operative Care
- Charcot Neuroarthropathy

**Features and Benefits**

**Higher Patient-Reported Preference Over Conventional Total Contact Cast (TCC)**
- The lightweight, woven design allows better airflow while wearing the device
- Enforces patient compliance between office visits and supports wound healing

**Easy to Use and Time-Saving Design**
- Prefabricated, woven design has been applied in under 10 minutes¹
- Requires minimal training time¹, and up to 4 times as many patients were casted compared with clinics using traditional casting²

**Confidence in Wound Closure**
- TCC has demonstrated closure rates of 88% of DFUs in 43 days³
- TCC is recognized as the Gold Standard and Preferred method for offloading DFUs²,⁴
TCC-EZ Healing Chamber®

Cast liner sock and felt padding

Single-layer cast sock, with hardening resin

Lightweight, customized boot

Designed to reduce shear and pressure forces to support healing

TCC has been shown to reduce amputation rates by more than half (Non-TCC 5.2%, TCC 2.2%)²
