INDICATIONS
The Salto Talaris Total Ankle Prosthesis is indicated as a total ankle replacement in primary or revision surgery for patients with ankle joints damaged by severe rheumatoid, post-traumatic, or degenerative arthritis. All components are intended for cemented use only.

CONTRAINDICATIONS
- Sepsis
- Infection sequelae
- Systemic infection, fever and/or local inflammation
- Complete talar necrosis
- Insufficient quantity of bone stock or poor skin coverage around the ankle joint that would make the procedure unjustifiable
- Persisting skin lesion
- Important ligament laxity
- Severe osteoporosis
- Ankle arthrodesis with malleolar exeresis
- Neuromuscular or mental disorders which might jeopardize fixation and postoperative care
- Neurobiologic diseases
- Nonfunctional lower limb muscles
- Complete loss of ankle collateral ligament
- Charcot’s arthropathy
- Elevation of WBC count
- Distant foci of infection from genitourinary, pulmonary, skin and other sites
- Dental focus infection which may cause hematogenous spread to the implant site
- Bone immaturity
- Known allergy to one of the materials
- Patient pregnancy
