**Preparation Instructions**

1. Open carton or box containing AmnioExcel membrane and remove the foil pouch.
2. Peel open the outer foil pouch and remove the inner Tyvek pouch using aseptic techniques.

*Note: The inner Tyvek pouch and its contents are sterile and may be placed directly into the sterile field.*

3. Peel the inner Tyvek pouch open and place the implant with the accompanying mesh, if applicable, into the sterile field.

*Note:*
- Care must be taken in transferring/removing the graft from the package as it is lightweight and may be easily displaced.
- The AmnioExcel graft is translucent and may look off-white or yellowish.
- It is important to note that the drier the surface to be covered with the graft, the easier the application.

4. Remove the allograft from the pouch and place it at the desired location for transplant.
5. Anchor the allograft using the physician’s choice of fixation if needed.

**Return Policy**

All return orders of AmnioExcel membrane require a Return Authorization (RA) number before product may be returned for credit. Please contact the Integra LifeSciences Customer Service Team for more information. All products being returned must be in original unopened packaging and in resalable condition.

*Note: BioDlogics, LLC makes no claims concerning the biological properties of allograft tissue. All tissue has been collected, processed, stored, and distributed in compliance with the FDA regulations governing HCT/Ps. Although every effort has been made to ensure the safety of allograft material, current technologies may not preclude the transmission of disease.*
